

Overview:

The ScentStream™ is a high performance, invisible solution best used to scent large settings. The advanced diffusion technology releases fragrance into existing heating and air conditioning ventilation systems without sprays, aerosols or heated oils. Adjustable scheduling and intensity settings make it flexible and easy to customize the scent output for any environment.

Product Features:

- Virtually silent operation
- Selectable output for 1 or 2 nozzles
- Patent-pending fragrance optimization system
- Provides coverage for areas with an air volume rate of up to 31,000 cubic feet/minute (52,000 cubic meter/hour)
- Twenty-four hour clock with programmable weekly events
- Simple and clean replacement of scent oil
- Anti-vibration wall mounts included
- Uses long-lasting 5L container
- Thousands of quality scents to choose from
- Optional duct pressure sensor for more efficient use of oil

SXD2110 - Technical Specifications

System Dimensions 11" W x 6" H x 5.1" D
27.9cm W x 15.2cm H x 12.9cm D

Container Dimensions 8" W x 11" H x 6.4" D
20.3cm W x 27.9cm H x 16.3cm D

Coverage Up to 31,000cfm (52000cmh - Dual Nozzles)

Variable Intensity 5% - 95% in increments of 5%

Day Timer 7-day , 24 hour timer with 14 event settings

Power Requirements 12V DC, with 100-240V AC Power adapter
with 35W 6ft. cable (CCC/PSE/UL/CE listed)
