

ScentDirect™

DIRECT DIFFUSION SYSTEM

The ScentDirect™ features advanced diffusion technology that converts liquid fragrance into a fine, dry, invisible mist and releases it directly into the environment. The ScentDirect is designed to maximize the efficiency of scent delivery and cover a medium sized area with more intensity. The system uses fragrance oil cartridges that are easily replaceable.

Product Features:

- Advanced atomization technology. Particles 1/50th the size of aerosol droplet and 1/125,000th the weight
- Patent Pending RecircuMax™ collector technology maximizes consistent fragrance delivery
- QuietDrive™ noise canceling technology
- Adjustable scent intensity settings
- Twenty-four hour clock with programmable events
- 30° directional fan-assisted output
- 180° rotational mount
- Simple and clean replacement of scent oil
- Track lighting or wall mountable
- Low maintenance with few moving parts
- Low voltage and low power consumption

ScentDirect SDD-4004 Technical Specifications

Dimensions	9" Tall, 5.7" Diameter (235mm x 145mm)
Weight	2.5lbs (1kg) or 4.7 lbs. (2.1kg) w/ cartridge
Coverage	Up to 30,000 cubic feet (850 cubic meters)
Variable Intensity	5% - 95% in increments of 5%
Day Timer	24-hour day timer with 14 event settings
Power Consumption	< 15 watts
Power Requirements	12V DC, supplied with 100-240VAC power adapter with 6 ft. (2m) cable (UL/CE listed)
